

UT3 – ALMACENAMIENTO – AJAX

PRACTICE 2

[Get](#)
[Post](#)
[Put](#)
[Patch](#)
[Delete](#)
[Clean DOM](#)

Run JsonServer on localhost with superheroes.json

You have to develop the next operations:

- Get: get all members
- Post: post a member
- Put: modify a member
- Patch: modify a member
- Delete: delete a member
- Clean DOM: clear all data in DOM unless the previous buttons.

Notice: it is a practice, so feel free to reuse your own code from practice1.

Get operation: with this format for each member

| |
|--|
| Id: 8a93 |
| Name: Molecule Man |
| Age: 29 |
| SecretIdentity: Dan Jukes |
| Radiation resistance <input checked="" type="checkbox"/> |
| Turning tiny <input checked="" type="checkbox"/> |
| Radiation blast <input checked="" type="checkbox"/> |

Post operation:

[Get](#)
[Post](#)
[Put](#)
[Patch](#)
[Delete](#)
[Clean DOM](#)

| |
|---|
| Id: 007 |
| Name: James Bond |
| Age: 73 |
| Secret Identity: English spy |
| Fly;Drive;Hide |
| Powers (separated by semicolon): <input type="text" value="Fly;Drive;Hide"/> |
| <input type="button" value="Send data"/> |

When you click on *Send data* button, a fetch will be done and a new member will be inserted.
